

## Germicidal Ultraviolet Wall Mounted Air Sanitizer

Standard white housing pictured. Color options available.

### DIMENSIONS

Width: 20", Height: 8", Depth: 17", Weight: 12.5 Lbs

| Lamps | Fixture Wattage | UV Output | CFM |
|-------|-----------------|-----------|-----|
| 2     | 244             | 38        | 600 |

A safe and effective air sanitizing option for a wide variety of commercial and industrial applications. Eliminates up to 99.9% of airborne viruses and bacteria including SARS-COV-2 which cause COVID-19. High output UV lamps sterilize inside an enlarged disinfection chamber to maximize kill zone capability. Recommended mounting height is a minimum of 7 feet above floor level for best results.

### APPLICATIONS

Manufacturing facilities, warehouses, hospital and medical facilities, health clubs, salons, churches, commercial kitchens, restaurants, offices, classrooms, etc.

### FEATURES & SPECIFICATIONS

- 600 CFM Air Flow For Maximum Circulation
- Large Disinfection Chamber Ensures Air Purification
- HEPA MERV 13 Filter Traps Airborne Viruses and Eliminates Odors
- Additional Filter Packs Available for Easy Swap out as Needed
- 11.3 Air Changes Per Hour (Based on a 20x20x8 Room @ 600 CFM)
- Dual Fan Speed for Air Regulation and Quiet Operation
- Precision Built For High Efficacy and Minimal Light Leak
- Easy Surface Mounting Direct to Wall or Junction Box
- Operating Hour Meter - Suggested Lamp Swap Out at 6,000 hours
- Wireless Control Options Available-Remote or Phone App
- Color and Textured Housing Options for Commercial Aesthetics
- Fixture Operating Wattage: 244 watts, 38 UV Output Watts
- Optional 16/3 SO Cord and Plug (Specify Nema)
- Philips TUV PL-L 60W High Output Lamps
- Advance PureVolt IUUV-2S60 Ballast, 120-240v, 50-60 Hz
- UV Band: UVC 254nm (200-280nm)
- UV Dose Depreciation Over Lifetime: 15%

### CONSTRUCTION

- .040 Pre-Painted Aluminum Housing Dissipates Heat
- Vented Bottom Intake and Top Exhaust
- Black Top Surface Absorbs Light Reflectivity
- UV Stabilized Lamp Sockets and Wiring for Long Life
- Fastener End Clips Secure Lamps and Provide Heatsink
- (2) Industrial Grade 300 CFM Axial Fans
- All Fixtures Are Made in The USA and 100% Bench Tested at Factory

### RATINGS & WARRANTY

- Philips UV Lamps: 9,000 Hour Rated Life
- Advance UV Ballasts: 5 Year Rated Life
- FDA & EPA Approved, RoHS Compliant
- 5 Year Product Warranty (Lamps 1 Year)

*Warning: UV-C light can increase the risk of developing skin and eye cancer upon human exposure while in operation. As a safety precaution humans should not be directly exposed to UV-C light. UV lamps should securely enclosed within housing during operation.*
